How to Contact Volk

See the Difference

All lenses are not the same; different lenses will not deliver the same image quality. Ensure you get the highest quality lenses to deliver the highest resolution, distortion-free imaging. The image below represents an actual side by side comparison of a Volk 20D lens compared with a non-Volk lens over a 2mm grid. The photo is not retouched.

Our Promise

Volk is known worldwide as the premier designer and manufacturer of the highest quality ophthalmic lenses. The first aspheric indirect ophthalmoscopy lens was developed by Dr. David Volk 50 years ago. This led to the patented, double aspheric designs of the 20D, 78D and 90D lenses, the leading standards in the ophthalmic industry.

Continual improvement saw the evolution and development of the 2nd generation – the Super Series lenses, to the unsurpassed imaging you can achieve today, with our 3rd generation Digital Series Lenses.

Volk's unmatched image quality can be appreciated across our comprehensive range of imaging products, including gonio lenses, direct and indirect laser lenses and a full range of surgical imaging products.

Laser Delivery

All Volk Lenses are suitable for Laser Delivery.

Classic Indirect BIO Lenses

In 1956, aspheric ophthalmic lenses for subnormal vision were developed by Dr. David Volk. He found that an aspheric surface corrected the aberrations present in more common spherical lenses.

Several developments occurred with the aspheric lens designs through the years, delivering far superior imaging for BIO examinations. In 1982 all Volk lenses for indirect ophthalmoscopy were redesigned with both surfaces aspheric, providing a substantial improvement in image quality.

The 20D and other Volk BIO lenses have been known as the industry standard for decades, and are still widely used in every corner of the world today.

BIO Lenses	Field of View	Image Mag.	Laser Spot Mag. Factor	Working Distance	Primary Application
Macula Plus® 5.5	36° / 43°	5.50x	.18x	80mm	Ultra-high resolution viewing of posterior pole
14D Large	36° / 47°	4.30x	.23x	75mm	High magnification viewing of posterior pole
15D Large	36° / 47°	4.11x	.24x	72mm	High magnification viewing of posterior pole
20D Large	46° / 60°	3.13x	.32x	50mm	General diagnosis & treatment
Pan Retinal® 2.2	56° / 73°	2.68x	.37x	40mm	General diagnosis & treatment
25D Large	52° / 68°	2.54x	.39x	38mm	Median field diagnosis & treatment
28D Large	53° / 69°	2.27x	.44x	33mm	Small pupil diagnosis & treatment
30D Small	46° / 60°	2.10x	.48x	30mm	Small profile lens for ease of use within the orbit
30D Large	58° / 75°	2.15x	.47x	30mm	Small pupil diagnosis & treatment
40D Large	69° / 90°	1.67x	.6x	20mm	Pediatric ophthalmoscopy / veterinary apps.
Digital BIO Lenses	Field of View	Image Mag.	Laser Spot Mag. Factor	Working Distance	Primary Application
Digital ClearMag	38° / 49°	3.89x	.26x	60mm	For detailed optic disc and posterior pole examination
Digital ClearField	55° / 72°	2.79x	.36x	37mm	For mid and far peripheral retinal viewing

Digital Series Indirect BIO Lenses

In the Volk spirit of improvement, our 3rd generation, 'Digital Series' BIO lenses were developed from the previous generation BIO lenses, in a similar fashion to the Digital Series slit lamp lenses. The goal: to deliver enhanced resolution imaging with the indirect ophthalmoscope.

Working with a high grade glass, we looked at all aspects of their double aspheric designs with advanced computer modeling techniques. We realized improvements in all aspects of the BIO lens capabilities, ultimately delivering the best image quality attainable for indirect ophthalmic exams.

Classic Indirect BIO Lenses

Macula Plus® 5.5

Primary Application – Ultra High Resolution Viewing of the Posterior Pole

- Excellent stereo imaging for diagnosis of macular abnormalities
- High magnification facilitates examination of geriatric patients
- Lens adapter provides stability with extended working distance

Product code: VMP5.5

2D View

Field of View

14D

Primary Application – High Magnification Viewing of the Posterior Pole

- High magnification provides excellent imaging of the macular and optic disc
- Detailed optic disc views facilitate glaucoma screening examination

Classic Slit Lamp Lenses

In 1956, aspheric ophthalmic lenses for subnormal vision were developed by Dr. David Volk. He found that an aspheric surface corrected the aberrations present in more common spherical lenses.

Several developments occurred through the years, leading up to 1982 when all Volk lenses for indirect ophthalmoscopy were redesigned with both surfaces aspheric, providing a substantial improvement in image quality.

A series of indirect ophthalmoscopy lenses was developed, resulting in the choice of the 90 Diopter lens as the most practical for indirect ophthalmoscopy with the slit lamp. The Volk 60D and 90D lenses were commercialized providing a variety of characteristics; magnification, field of view and undilated pupil examination.

The 60D and 90D lenses have been known as the industry standard for decades, having revolutionized the slit lamp examination in the 1970s.

Classic	Field of View	Image Mag.	Laser Spot	Working Distance	Primary Application
60D Classic	68° / 81°	1.15x	.87x	13mm	High magnification views of the posterior pole
78D Classic	81° / 97°	.93x	1.08x	8mm	General diagnosis and treatment
90D Classic	74° / 89°	.76x	1.32x	7mm	General diagnosis / small pupil examinations
Super Series	Field of View	Image Mag.	Laser Spot	Working Distance	Primary Application
Super 66®	80° / 96°	1.0x	1.0x	11mm	High Resolution viewing of the posterior pole
SuperField®	95° / 116°	.76x	1.3x	7mm	General retinal scanning situations
Super VitreoFundus®	103° / 124°	.57x	1.75x	4-5mm	Wide field retinal scanning and small pupil exams (3-4 mm)
SuperPupil® XL	103° / 124°	.45x	2.2x	4mm	Examination through small pupils (2-3mm)
Digital Series	Field of View	Image Mag.	Laser Spot	Working Distance	Primary Application
Digital High Mag®	57° / 70°	1.30x	.77x	13mm	Highest resolution and magnification imaging of the posterior pole with reduced glare and reflections.
Digital 1.0x Imaging Lens	60° / 72°	1.0x	1.0x	12mm	High resolution 1.0x imaging with reduced glare ideal for optic disc measurements and slit lamp photography.
Digital Wide Field®	103° / 124°	.72x	1.39x	4-5mm	High resolution, wide field retinal scanning and reduced glare and reflections.

Classic Slit Lamp Lenses

60D

Primary Application – High Magnification Views of the Posterior Pole

- High magnification lens for detailed optic disc and macula imaging
- Ideal diameter for use in the orbital area

Product code: V60C

2D View

Field of View

78D

Primary Application – General Diagnosis and Laser Treatment

- Ideal balance of magnification and field of view
- Optimally designed for use within range of motion of all slit lamps

2nd Generation...

Super Series Slit Lamp Lenses

Our drive to improve indirect imaging at the slit lamp led us to develop our 2nd generation slit lamp lenses. Working with high grade glass types, we reviewed and improved the double aspheric designs which were so successful in the classic 90D, 78D and 60D lenses, to bring the 'Super Series'. A group of 4 lenses was developed to deliver wide field, high magnification and specialty features such as unsurpassed small pupil capabilities – the full diagnostic spectrum.

Classic	Field of View	Image Mag.	Laser Spot	Working Distance	Primary Application
60D Classic	68° / 81°	1.15x	.87x	13mm	High magnification views of the posterior pole
78D Classic	81° / 97°	.93x	1.08x	8mm	General diagnosis and treatment
90D Classic	74° / 89°	.76x	1.32x	7mm	General diagnosis / small pupil examinations
Super Series	Field of View	Image Mag.	Laser Spot	Working Distance	Primary Application
Super 66®	80° / 96°	1.0x	1.0x	11mm	High Resolution viewing of the posterior pole
SuperField®	95° / 116°	.76x	1.3x	7mm	General retinal scanning situations
Super VitreoFundus®	103° / 124°	.57x	1.75x	4-5mm	Wide field retinal scanning and small pupil exams (3-4 mm)
SuperPupil® XL	103° / 124°	.45x	2.2x	4mm	Examination through small pupils (2-3mm)
Digital Series	Field of View	Image Mag.	Laser Spot	Working Distance	Primary Application
Digital High Mag®	57° / 70°	1.30x	.77x	13mm	Highest resolution and magnification imaging of the posterior pole with reduced glare and reflections.
Digital 1.0x Imaging Lens	60° / 72°	1.0x	1.0x	12mm	High resolution 1.0x imaging with reduced glare ideal for optic disc measurements and slit lamp photography.
Digital Wide Field®	103° / 124°	.72x	1.39x	4-5mm	High resolution, wide field retinal scanning and reduced glare and reflections.

Super Series Slit Lamp Lenses

Available in 7 different colors
(shades may vary)

Super 66®

Primary Application – High Magnification Viewing of the Central Retina

- Enables 3D discernment of subtle macular and optic disc detail
- 1.0x magnification simplifies optic disc measurement

Product code: VS66

2D View

Field of View

Available in 7 different colors
(shades may vary)

Super Field NC®

Primary Application – Wide Field, Pan Retinal Examination

- 'Super 90D': Same magnification with a wider field of view
- Increased working distance compared to competitive fundus lenses

Product code: VSFNC

2D View

Field of View

Super VitreoFundus®

Primary Application – Wide Field, Pan Retinal Examination and Small Pupil Capability*

- Widest field of view in a non contact lens with views past the vortex
- Excellent small pupil capability through a 3 – 4mm pupil

Product code: VSVF

2D View

Field of View

Super Pupil® XL

Primary Application – Small Pupil Pan Retinal Examination

- Optimal small pupil capability through a pupil as small as 2 - 3mm
- Excellent for diabetic patients with miotic eyes

Product code: VSPXL

3rd Generation...

Digital Series Slit Lamp Lenses

The Digital Series are our 3rd generation, double aspheric, non-contact slit lamp lenses. Building on the 'Super Series' lenses with high grade glass, we enhanced our double aspheric designs further with advanced computer modeling. Also, gains in the quality of our A/R coating provided a noticeable reduction in glare and reflections. We found that this helped improve slit lamp photographic imaging. However, photography is not their sole purpose. The Digital Series lenses provide the finest views for all examinations and imaging, enabling discernment of details previously unattainable at the slit lamp.

Classic	Field of View	Image Mag.	Laser Spot	Working Distance	Primary Application
60D Classic	68° / 81°	1.15x	.87x	13mm	High magnification views of the posterior pole
78D Classic	81° / 97°	.93x	1.08x	8mm	General diagnosis and treatment
90D Classic	74° / 89°	.76x	1.32x	7mm	General diagnosis / small pupil examinations
Super Series	Field of View	Image Mag.	Laser Spot	Working Distance	Primary Application
Super 66®	80° / 96°	1.0x	1.0x	11mm	High Resolution viewing of the posterior pole
SuperField®	95° / 116°	.76x	1.3x	7mm	General retinal scanning situations
Super VitreoFundus®	103° / 124°	.57x	1.75x	4-5mm	Wide field retinal scanning and small pupil exams (3-4 mm)
SuperPupil® XL	103° / 124°	.45x	2.2x	4mm	Examination through small pupils (2-3mm)
Digital Series	Field of View	Image Mag.	Laser Spot	Working Distance	Primary Application
Digital High Mag®	57° / 70°	1.30x	.77x	13mm	Highest resolution and magnification imaging of the posterior pole with reduced glare and reflections.
Digital 1.0x Imaging Lens	60° / 72°	1.0x	1.0x	12mm	High resolution 1.0x imaging with reduced glare ideal for optic disc measurements and slit lamp photography.
Digital Wide Field®	103° / 124°	.72x	1.39x	4-5mm	High resolution, wide field retinal scanning and reduced glare and reflections.

Digital Series Slit Lamp Lenses

Available in 7 different colors
(shades may vary)

Digital High Mag®

Primary Application – Highest Resolution, High Magnification Imaging of the Central Retina

- Low dispersion™ glass reduces chromatic aberration for extremely high resolution retinal imaging
- High magnification provides topographical views of the nerve fiber layer
- Outstanding stereopsis allows detection of optic disc swelling, cupping and macular serous fluid

Product code: VDGTLMH

SuperMacula® 2.2	60° / 78°	1.49x	.67x	Ultra-high resolution diagnosis and treatment near the fovea

Note :

Flanged versions provide optimal stability on the cornea.

No flange (NF) versions have a smaller corneal contact area than flanged versions. It is still necessary to use a contact fluid with these versions.

Our exclusive ANF+ flanged version is designed to provide optimal stability without the need for a contact fluid. It may be beneficial to utilize a lubricating fluid for patient comfort.

H-R Wide Field

Primary Application – Widest Field Views of Any Lens for Examination and Laser PRP Treatment

- Low dispersion glass eliminates distortion, ensuring highest resolution imaging to the ora
- Low profile, reduced size housing simplifies manipulation within the orbit
- Superb upgrade or replacement for the Rodenstock pan fundus lens

Product code: VHRWF

2D View

Field of View

Super Quad® 160

Primary Application – Extreme Wide Field Examination and Laser Treatment

- Wide field views for complete retinal imaging out to the ora serrata

Note :

Flanged versions provide optimal stability on the cornea and are suggested for laser treatment use.

No flange (nf) versions have a small corneal contact area and are excellent for diagnostic work. It may not be necessary to use a contact fluid with these versions (G Series Gonio lenses only)

Our exclusive ANF+ flanged version is designed to provide optimal stability without the need for a contact fluid. It may be beneficial to utilize a lubricating fluid for patient comfort.

Gonio Lenses

G-1 trabeculum

Primary Application – Treatment of the Anterior Chamber and Central Retina

- All glass design provides superior clarity and durability compared to acrylic lenses
- Highest magnification of any single mirror Gonio lens
- Flanged version provides stability for trabeculoplasty
- No flange version ideal for gonioscopy

Product code: VG1 (as shown)
VG1NF (no flange)

2D View

G-2 trabeculum

Primary Application – Viewing and Treatment of the Anterior Chamber and Central Retina

- Two differently angled mirrors provide broader views of the anterior chamber
- All glass design provides superior clarity and durability compared to acrylic lenses
- Flanged version provides stability for trabeculoplasty
- No flange version ideal for gonioscopy

Product code: VG2 (as shown)
VG2NF (no flange)

2D View

3 Mirror

Primary Application – Viewing and Treatment of the Anterior Chamber and Central and Peripheral Fundus

- Viewing mirrors are accurately angled to eliminate gaps in the visualized fundus
- Flattest mirror surfaces minimize image distortion
- Exclusive advanced no fluid (ANF+) flange option eliminates need for viscous coupling fluid. (Not recommended for laser procedures.)

Product code:
V3MIR (no flange) (as shown)
V3MIRANF+ (Advance No Fluid)
VU3MIR Diagnostic (no flange) (No Coating)
VU3MIRANF+ Diagnostic (Advance No Fluid - No Coating)

2D View

G-3 Goniofundus

Primary Application – Viewing and Treatment of the Anterior Chamber and Central and Peripheral Fundus

- All glass design provides superior clarity and durability compared to acrylic lenses
- Mirrors are accurately angled to eliminate gaps in the visualized fundus
- Flanged version provides stability for trabeculoplasty
- No flange version ideal for gonioscopy

Product code:
VG3 (best design for laser use)
VG3NF (no flange) (as shown)
VG3MININF (no flange) (as shown)

2D View

Available in mini version for pediatric and small orbit patients

G-4 Goniolaser

Primary Application – Standard Gonio Lens for Static and Dynamic Gonioscopy

- All glass design provides superior clarity and durability compared to acrylic lenses
- Available in large or small rings or with 2 position handle to suit personal preferences
- Flanged version provides stability for trabeculoplasty
- No flange version ideal for gonioscopy

Product codes:

VG4 (with flange) (as shown) best design for laser use
 VG4SNF (no flange) 25.5mm Ring
 VG4LNF (no flange) 28.5mm Ring
 VG4HAN2(no-flange) Extended Handle (as shown)

2D View

G-4 High Mag

Primary Application – High Magnification Static and Dynamic Gonioscopy

- All glass design provides superior clarity and durability compared to acrylic lenses
- Available in large or small rings or with 2 position handle to suit personal preferences
- Flanged version provides stability for trabeculoplasty
- No flange version ideal for gonioscopy

Product codes:

VG4HM(with flange) (as shown) best design for laser use
 VG4HMSNF (no flange) 25.5mm Ring
 VG4HMLNF (no flange) 28.5mm Ring
 VG4HMHAN2(no-flange) Extended Handle (as shown)

2D View

Mini 4 Mirror

Primary Application – Mini Gonio Lens for Narrow Orbits and Small Anatomies

- Small body and ring for ease of use within the orbit
- Proprietary flange does not require viscous coupling fluid
- Broadband coating reduces reflections and glare and maximizes laser throughput

Product code: VM4ANF+

2D View

G-6 Gonio

Primary Application – Static and Dynamic Gonioscopy

- Six closely aligned mirrors eliminate gaps providing a true panoramic view
- More complete mirror structure facilitates positioning and scanning across mirrors
- Tapered lens body design easier to hold within the orbit
- Available with a ring or 2 position handle to suit personal preference
- No flange/fluid design ideal for gonioscopy

Product codes:

VG6LNF (no flange) 28.5mm Ring (as shown)
 VG6HAN2 (no flange) Extended Handle (as shown)

2D View

Selective Laser Trabeculoplasty (SLT)

Primary Application – SLT procedures and static/dynamic gonioscopy

- Large internally reflective facet provides excellent view of the angle
- 1.0x magnification maintains laser spot size and power density
- Curved upper lens surface ensures laser beam profile remains circular for consistent laser spot placement
- Contact used with coupling fluid ensures stability for laser delivery

Product code: VSLT

Surgical Gonio Lenses

Lens	Image Mag.	Contact Diameter	Ring Diameter	Handle Length
TVG	1.2x	9mm	14mm	84 mm
Surgical Gonio	1.2x	9mm	10mm	75mm

Transcend Vold Gonio (TVG) Lens

Primary Application – Direct Views for Micro-Invasive Glaucoma Surgery (MIGS) and All Intraoperative Gonio Procedures

- Stabilization ring provides control of the globe
- Minimizes corneal pressure to prevent anterior chamber distortion
- Visualizes angle in primary phaco position with minimal microscope and head adjustments
- Fully steam sterilizable

Product code: VTSTVG

2D View

Surgical Gonio Lens

Primary Application – Direct Views for Intraoperative Gonio Procedures

- Lens position can be adjusted relative to the handle: for left hand and right hand or center position
- Applicable for MIGS procedures
- Sterilizable by either steam autoclave or ethylene oxide (ETO)

Product code: VSGACS

Volk Eye Check

The Volk Eye Check is an electronic handheld device that provides automatic real-time measurements of 7 different eye features. Clinician benefits are:

- Complements and enhances standard examinations, eg – cover test; assessment of anisocoria, ptosis, buphthalmos. Particularly helpful when clinician is unsure about strabismus, pupil size, lid position. Can reduce potentially missed conditions.
- Provides objective and repeatable measurements of key eye features – strabismus angle, pupil size, lid position, iris diameter, eye aperture.
- Reduces trial-and-error in fitting contact lenses by providing the accurate size of irises, pupils, lid position and pupil eccentricity.
- Provides objective digital documentation of eye features and eye conditions; retention of electronic records and helpful for onward referrals.
- Reduces inter-clinician variability – standardize testing across practices and between clinicians in multi-site environments such as optometry chains and healthcare groups.
- Provides proof and record of examination in case of litigation.
- Saves clinician time - abnormalities can be quickly identified and immediately investigated by the clinician.
- Saves chair time – testing with the device can be performed by an assistant and clinician reviews the results

Pictor Portable Ophthalmic Imager

Volk Pictor is a truly portable digital imaging device that provides a variety of imaging capabilities with two interchangeable modules for ophthalmic examination.

Improved Patient Care - Digital still and video images created with Pictor provide accurate first diagnosis and planning for consistent follow up treatment.

Simple Integration - Pictor is easily adopted into daily examination routines, providing standard jpeg image files for simple image data storage and sharing.

Maximum Portability - Lightweight and portable, Pictor is easily used outside the office to examine convalescing patients and for geriatric or pediatric care.

Superior Versatility - Two easily interchangeable modules provide high-resolution retinal (non-mydratic) or external eye imaging.

See Pictor brochure ML-1009 for more information

Pictor Plus

Pictor Plus builds on the success of Pictor with some exceptional added features. See table below to compare.

Features	Pictor	Pictor Plus
Versatile Images both retina and anterior segments	✓	✓
Portable Fits in a small briefcase and weighs just 1lb.	✓	✓
Non-mydratic retinal imaging Pupils as small as 3mm	✓	✓
Anterior imaging White or blue (fluorescein) LED lighting	✓	✓
Storage More than 1,000 high resolution jpg images on SD card	✓	✓
Simple integration Images upload to PC via USB connection	✓	✓
Improved image resolution Meets ISO fundus camera requirements		✓
Auto focus assist Senses optimal retinal view and automatically takes the image		✓
9 fixation targets For a variety of retinal images		✓
Patient ID entry via keypad Facilitates patient records/folders		✓
Additional Wi-Fi PC connectivity Enhances portable capabilities		✓
Improved glare free anterior segment imaging		✓

See Pictor Plus brochure ML-1013 for more information

Merlin Surgical System

The MERLIN® Surgical System is the finest system for non-contact vitreoretinal procedures. With the pedigree of Volk optics, it delivers unmatched image resolution, superior to any other non-contact system.

It is available in two platforms: a Condensing Lens Assembly (CLA) and Rotational Assembly (RA). The CLA platform includes both automated and manual versions.

Its Lens Positioning Unit positions the lens in alignment with the microscope optical pathway, allowing 360° rotational movement.

Indirect Non-Contact Surgical Lenses

3 lenses are available, all highly suited for repeat steam sterilization without material degradation, maintaining superior optical quality throughout the long life of the lens.

- Wide Angle - allows visualization of the retina out to the ora serrata.
- Small Diameter - increases space for instrument manipulation. Maintains 94% of the field of view of the wide angle lens.
- Mid Field - higher magnification views for detailed imaging of the posterior pole.

See Merlin brochure ML-1005 for more information.

Reinverting Operating Lens System® (ROLS®)

The ROLS unit is used with all surgical microscopes for viewing the retina with contact lenses, non contact systems and the MERLIN® non contact surgical viewing system.

The classic ROLS is a technically advanced panoramic viewing system to provide reinverted images during vitreoretinal surgery, and delivers high resolution, correctly oriented retinal images.

Easily installed on all standard surgical microscopes

Removable magnetic latching handles facilitate cleaning and sterilization

A ROLS+ reinverter delivers the added benefit of decreased working distance when switching between a plano/concave lens to a wide field indirect lens, providing a more comfortable working position. Note: when used with an assistant scope, the ROLS+ reinverter may cause the assistant scope to be out of focus on some microscopes.

ROLS ∞ (Infinity)

The ROLS∞ provides superior image quality with minimal image shift. It has a unique feature to allow precise custom alignment with the microscope to minimize and eliminate image shift and vignetting.

It is available in manual and powered versions. The powered version is operated by footswitch to toggle between inverted and correctly oriented views. It may also be switched manually if needed.

Easily installed on all standard microscopes

LED indicators show inverted and correctly oriented positions

Removable handles facilitate cleaning and sterilization

Indirect Surgical Lenses

High Resolution (HR) Direct Image Surgical Lenses

Volk's HR direct image lenses utilize a high index glass to deliver superior image quality. This robust glass type is highly resistant to the rigors of continued steam sterilization and will not deteriorate or discolor.

These lenses are commonly used with a suture or stabilization ring. Two of the lenses in the group are also available in a no suture ring design. The profiles of these two lenses allows them to stabilize suitably without the need for an additional stabilizing ring.

Lenses	Field of View	Image Mag.
HR Direct Image 1X	30°	1.0x
HR Direct Bi-Concave	45° (mid field) 30° (AFX)	0.5x (mid field) 1.0x (AFX)
HR Direct High Mag	20°	1.4x
HR Direct 20° Prism	40° (offset 20°)	0.5x

High Resolution Direct Image Surgical Lenses

HR Direct 1X

Primary Application – Direct Image Vitreoretinal Surgery of the Central Retina

- High index glass delivers highest resolution direct image of the central retina
- Highly suited for repeated steam sterilization with no material degradation
- Standard design fits all major suture rings
- Unique optional no stabilizing ring (NSR) design available

Research Lenses

Lens	Part Number	Image Mag.	Contact Diameter	Lens Height	Handle Length
2mm Fundus	V2MFUNDUS	1.0x	2mm	5mm	76mm
2mm Gonio	V2MGONIO	1.0x	2mm	11mm	84mm

Fundus Lens

Provides high resolution views of the posterior pole. Its upper surface has an AR coating to minimize reflections and glare and maximize laser throughput. The contact surface is conically shaped to facilitate placement and does not require viscous coupling fluid. Its handle is fixed at 45°.

Glass Gonio Lens

Provides high resolution views of the anterior chamber angle structures with 4 equally angled mirrors. Views of the optic nerve and posterior retina can be obtained through the center of the lens. The small contact surface does not require viscous coupling fluid. Its handle may be fixed in 2 positions: straight or at a 45° angle.

Accessories

Not for use on surfaces that contact the eye.

Volk Lens Pen®

Primary Application – Dry Cleaning of Coated Ophthalmic Lens Surfaces

- Carbon based cleaning pad wipes away smudges and reduces static build up
- Cost effective device good for 400 – 500 uses
- Conveniently stows away like a pen with a pocket clip

Product code: VLENSPEN

Not for use on surfaces that contact the eye.

Precision Optical Lens Cleaner

Primary Application – Cleaning of Ophthalmic Lenses

- Absorbent, moistened lint free towelette cleans lenses instantly, free from smudges, haze and water spots
- Ideal for use on Volk lenses, microscope eyepieces, cameras and other precision optical surfaces.
- Packaged in boxes of 24. Bulk case purchase contains 108 boxes

Product code: VPOLC1 (box)
VPOLCCASE (CASE)

Accessories

Steady Mount

Primary Application – Precisely Holds and Positions Volk Lenses at the Slit Lamp

- Holds lenses steady at the slit lamp to facilitate photography and routine examinations
- Lens can be positioned, tilted and angled in all planes providing versatility
- Adapts to all slit lamps and holds all Volk lenses ensuring ease of use

Product code: VSM

Suture Ring

Primary Application – Provides a Stable Lens Platform During Vitreoretinal Surgery

- Premium surgical implant grade titanium for optimal durability and ease of sterilization
- Larger radius provides enhanced functionality and safety during use
- Compatible with all Volk direct and indirect contact vitrectomy lenses (except SSV® styles)

Product code: VSRS2

Infusion Handle

Primary Application – Infusion of Saline Solution Beneath the Lens During Vitreoretinal Surgery

- Flushes blood and debris providing a clear view during surgery
- Autoclave Sterilizable for decreased processing time
- Ideal for diabetic surgery

Product code: VINFHAN

Vitreolens Handle

Primary Application – Holding and Stabilization of Lenses During Vitreoretinal Surgery

- Holds vitrectomy lenses stably to assist vitreoretinal surgery
- Malleability allows user to bend the handle to suit their preference
- Autoclave Sterilizable for decreased processing time

Product code: VVITHAN-LG (Used with Mini Quad and Central Retinal)
VVITHAN-MQXL (Used with HRX, Mini Quad XL and Super Macula)

Sterilization Tray

Primary Application – Sterilization of Ophthalmic Lenses

- Autoclave safe and approved for use with ETO
- Small tray (2.7" x 1.5" x 1.25") houses Volk surgical and smaller indirect and slit lamp lenses
- Large tray (6" x 2.5" x 1.25") houses the largest Volk lenses and accessories including vitrectomy handles

Product code: VSCA (small tray)
VSCB (large tray)

Cases and Personalization

Keep your personal lens sets together with our multi lens cases. Available in two sizes : 3" x 4" for up to 3 lenses or 4" x 6" for up to 6 lenses, almost any combination can be accommodated. Even if a standard case cannot meet your need, we can provide a customized solution for you.

Here are a few examples of some cases and combinations.

To personalize your lens purchase, you can have your lenses engraved with your details.

Technical Specifications

Patented Double Aspheric Lens Design

All Volk lenses are optically engineered using proprietary computer ray tracing and design criteria. The laser contact lens ray tracing at left shows light rays originating at the illuminated fundus and proceeding through the pupil and cornea to the first contact element. The diverging light bundles are converged and redirected towards the double aspheric imaging lens which further refracts and focuses the rays as a conjugate fundus image in the aerial image plane. From the beginning on the drawing board to final production and sale, each Volk lens is designed and produced to the quality standards that your practice demands.

Contact Options (Gonio Lenses)

Flanged versions provide optimal stability on the cornea and are suggested for laser treatment use.

No flange (NF) versions have a small corneal contact area and are excellent for diagnostic work. It may not be necessary to use a contact fluid with these versions (Gonio lenses only)

Our exclusive ANF+ flanged version is designed to provide optimal stability without the need for a contact fluid. It may be beneficial to utilize a lubricating fluid for patient comfort.

Contact Options (Contact Laser Lenses)

Flanged versions provide optimal stability on the cornea.

No flange (NF) versions have a smaller corneal contact area than flanged versions. It is still necessary to use a contact fluid with these versions.

Our exclusive ANF+ flanged version is designed to provide optimal stability without the need for a contact fluid. It may be beneficial to utilize a lubricating fluid for patient comfort.

Volk Laser / Anti-reflective Coatings and Filters

Most Volk lenses come standard with high efficiency laser / anti-reflective (AR) coatings to optimize laser throughput and to assist in diagnosis by reducing glare in the visible spectrum.

Please Contact Volk for Additional Information on laser coatings

Warranty Information

Warranty Service

If the product fails to function due to defects in either materials or workmanship, Volk will, at its option, either repair or replace the product without charge, subject to the Warranty Limitations.

Warranty Coverage

Volk Optical warrants its Non-contact Slit Lamp & BIO Lenses against defects in materials or workmanship for a period of 10 years from receipt by end user.

Volk Optical warrants its Volk Contact Laser & Diagnostic Lenses against defects in materials or workmanship for a period of 5 years from receipt by end user.

Volk Optical warrants its All GLASS G Series Mirrored Lenses against defects in materials or workmanship for a period of 4 years from receipt by end user.

Volk Optical warrants its standard 3 and 4 Mirror Lenses against defects in materials or workmanship for a period of 1 year from receipt by end user.

Volk Optical warrants its 2mm research lenses (fundus and gonio) against defects in materials or workmanship for a period of 1 year from receipt by end user.

Volk Optical warrants its Pictor, Pictor Plus and Eye Check ophthalmic imaging devices against defects in materials or workmanship for a period of 1 year from receipt by end user.

Volk Optical warrants its Optiflex® Surgical Assistant, MERLIN® and ROLS® Reinverter against defects in materials or workmanship for a period of 1 year from receipt by end user.

Volk Optical warrants its Volk Vitrectomy Lenses against defects in materials or workmanship for a period of 1 year from receipt by end user.

Volk Optical warrants its Volk Autoclave Sterilizable (ACS) Vitrectomy and Gonio lenses against defects in materials or workmanship for the lesser of 6 months from receipt by end user or 100 sterilization cycles.

Volk Optical warrants its Volk Power, Contact, Yellow Filter, Retinal Scale and Lid Lens Adapters; VitreoLens Handle®, Infusion Handle & Steady Mount against defects in materials or workmanship for a period of 6 years from receipt by end user.

Product Returns

All product returns must be disinfected and/or sterilized prior to return and be accompanied by a Return Authorization Number.

Please contact Volk Optical for a Return Authorization Number. Customers are responsible for returning products to Volk Optical; 7893 Enterprise Drive; Mentor, OH 44060; U.S.A. We recommend that all returns be insured and be sent by a traceable shipment method. Volk cannot be held responsible for lost shipments.

Warranty Limitations

Warranty service may not be provided without proof the product was purchased from Volk Optical Inc. or an Authorized Volk Distributor.

This warranty becomes null and void if the customer fails to return the product in packaging consistent with the original protective packaging and it results in shipping damage.

This warranty becomes null and void if the customer fails to follow the recommended cleaning, disinfection and sterilization instructions and/or cautions contained in the product instruction manual.

This warranty does not cover service required because of disassembly, unauthorized modifications or service, misuse and abuse.

Warranty repairs will include labor, adjustments and replacements parts. Replacement parts may be remanufactured or contain remanufactured materials.

Limit of Liability

Seller makes no other warranty, express or implied, of the product supplied hereunder, including, without limitation, implied warranties of merchantability and fitness for a particular purpose, and all such warranties are hereby expressly excluded. Seller shall have no liability for loss of profits, or special, incidental, or consequential damages under any circumstances or legal theory, whether based on negligence, breach of warranty, strict liability, tort, contract, or otherwise. Seller shall in no event be liable in respect of this order and/or product delivered on account of this order for any amount greater than that paid to seller on account of this order. The purchaser acknowledges that it is purchasing the goods solely on the basis of the commitments of the seller expressly set forth herein.

If you have questions regarding Volk's warranty, please contact Volk Optical.

Ordering Information
